

WM EVENTS × PIVOT EXPERIENTIAL

PIVOT XP · EXPERIENTIAL TECHNOLOGY

THE EXPERIENCE CATALOG

PREPARED FOR WM EVENTS · AUGUST 2026

Capture systems, gamification, AI enhancements, and physical takeaways. Every unit in this catalog is built, wrapped, and crewed by Pivot — so the technology inside your rooms holds the same standard as the rest of the design.

The Life of the Party

PIVOTXP.COM · TOMMY@PIVOTXP.COM

01 The Booth Line

Six capture systems, one standard: broadcast-quality output, full custom wraps in your client's brand, and uptime your producers can bet on. Every unit ties into the registration platform you're already running, and every unit supports AI background removal.

● SHOWN WRAPPED IN WM EVENTS LIVERY — EACH UNIT IS RE-SKINNED PER EVENT

PB • 01

Selfie Station

The ring-light icon, rebuilt as brandable real estate. A freestanding kiosk with a halo light and a full-wrap column — it keeps a line moving all night in a two-foot footprint, which is usually the only floor you have left.

STILLS • GIF • BOOMERANG • VIDEO / SMS • EMAIL • QR / 2 FT FOOTPRINT

PB • 02

Pro

DSLR-grade capture with an adjustable head and a dual-sided display — the photographer-quality booth without the photographer, and without the light stands in your sightlines.

DSLR CAPTURE • STILLS • GIF • BOOMERANG • VIDEO • PHYSICAL TAKEAWAYS

PB • 03

Elevated Kiosk

The statement piece. Full-body kiosk with programmable LED edge lighting, a large portrait touch display, and DSLR-grade capture — optional on-board printing puts a takeaway in hand within seconds of the shutter.

DSLR CAPTURE • PROGRAMMABLE LED EDGE • OPTIONAL PRINTING • PHYSICAL TAKEAWAYS

01 The Booth Line

Motion systems

Continued — the units that move. Robotic, orbital, and bullet-time capture, for the moment in the run-of-show where the room needs to stop and watch something happen.

PB • 04

Robot

A rail-mounted robotic arm running programmable, cinematic slow-motion moves. It is a crowd magnet on its own, and it shoots like a camera operator who never gets tired.

PROGRAMMABLE MOVES • **CINEMATIC SLOW-MO** • RAIL-MOUNTED ARM

PB • 05

360 Camera

Slow-motion orbit video with branded overlays, delivered to the guest before they walk away. Mount it on truss for a cinematic overhead, or floor-mount it when the footprint is tight.

TRUSS OR FLOOR MOUNT • **INSTANT DELIVERY** • BRANDED OVERLAYS

PB • 06

Array

Bullet-time from a seven- or fourteen-camera gantry. Every lens fires in sync to freeze the moment, then sweeps around it — branded end to end, from the gantry wrap to the final frame.

7 OR 14 CAMERAS, SYNCED • FREEZE + SWEEP • BRANDED END TO END

02 AI Enhancements

A software layer that runs on every booth in the line. Rendered in seconds, on site, on our hardware — no cloud queue, no "we'll email it tomorrow."

ENH • 01

AI Image Regeneration

A guest's photo becomes the input to a full prompt — regenerated inside a scene you art-direct.

ENH • 02

Themed Regeneration

The same engine, art-directed to a theme — so the output matches the room, not a generic filter.

ENH • 03

AI Head Swap

The guest's face on a pre-approved branded body — every logo exactly where legal signed off.

ENH • 04

AI Background Removal

Subjects stay exactly as shot, placed naturally into the scene. Works on every unit in the line.

ENH • 05

Personalized Signage

Guests type their name and it renders into the scene — a marquee, a menu board, a step-and-repeat.

ENH • 06

AI Walk-Out Video

A guest photo plus a prompt becomes a custom walk-out video — the guest as the hero of the night.

03 Physical Takeaways

These leave the event on refrigerators, desks, and binders — and keep the brand living there long after load-out.

TA • 01

Magnets

Pressed on site, minutes after capture — square, round, or postcard-sized.

TA • 02

Postcards

Front: the guest. Back: an art-directed mailer with a QR back to the brand.

TA • 03

Trading Cards

Every guest becomes a rookie card — sleeved, collectible, fully branded.

TA • 04

Posters

Full-size prints of the money shot — guests leave carrying the proof.

04

Gamification & Custom Software

Give guests something to win and they will queue for it. Custom game builds with real-time scoring, written for the event rather than licensed off a shelf.

GAME • 01

Car Karaoke

Guests take the driver's seat and perform — a share-ready music video waiting for them at the door.

GAME • 02

Pitch Against the Machine

A radar-tracked pitching duel against a pro on screen. Built, tuned, and crewed by us.

GAME • 03

Leaderboards

Live standings on any screen in the room, updated the moment a score lands.

05

Platform & Connectivity

One identity system underneath every touchpoint — so the data you promised the client actually shows up, and the activation never waits on venue internet.

PLAT • 01

One Credential, Whole Footprint

Every product ties into the registration platform already running your event — guests are identified once and recognised everywhere after that.

01

REGISTER ONCE

At the entrance, on the tablets you already have.

02

QR OR RFID

One credential for the entire footprint.

03

TAP ANY PIECE

Nobody enters their information twice.

04

DATA FLOWS BACK

Into your system — no new compliance surface.

PLAT • 02

Event Internet

Rented by the event, deployed by our crew. Starlink units put full-bandwidth internet anywhere outdoors — a parking lot, a ski slope, a fairground, a tented field in north Georgia. For footprints that need extra coverage we run redundant Wi-Fi with live failover, so the activation never waits on house internet.

STARLINK RENTAL FLEET

REDUNDANT WI-FI MESH

LIVE FAILOVER BACKUPS

FULL OUTDOOR COVERAGE

STANDARD ON EVERY UNIT

What ships with all of it, without being asked.

Custom wrap

Built to your client's brand book, printed in-house before load-in.

On-site crew

Our technicians run the unit all event. You never staff it.

Same-night delivery

Guests get their content before they leave the room.

Reporting export

Scans, sessions, shares and opt-ins, in your client's format.

06 In the Field

Beyond the booth line: full custom sets, broadcast desks, and branded builds — designed, fabricated, and run by Pivot crews. If it needs to be built and it needs to work on show day, it belongs on this page.

CUSTOM SETS · BROADCAST DESKS · BRANDED BUILDS · INTERACTIVE WALLS

ONE VENDOR, ONE STANDARD

We build it, we wrap it, we run it.

Design, fabrication, install, on-site crew, and strike — handled by the same team that built the software inside. There is no second phone number to call at 6pm on show day.

DESIGN

FABRICATION

INSTALL

ON-SITE CREW

STRIKE

Proof of Work

The online edition of this catalog runs three real client builds you can drive in the browser — no install, any device. These are shipped projects, not mockups.

01

Polaris "Tough Doesn't Quit" Kiosk

A 6.1 GB Unity kiosk rebuilt as a 130 MB webpage — magnetic carousels, tap-to-play, an idle attract loop, and every interaction captured for reporting.

pivotxp.github.io/wm-events-catalog/polaris.html

02

Music Trivia Leaderboard

A real arcade leaderboard screen, fed by simulated score submissions so you can watch standings shuffle live — the same build that ran on the floor.

pivotxp.github.io/wm-events-catalog/#proof

03

Phone-to-Jumbotron Wall

Build a dedication sign on your phone and watch it hit the stadium board seconds later — the full phone-to-jumbotron pipeline, running live on the page.

pivotxp.github.io/wm-events-catalog/#proof

TAKE THE ASSETS WITH YOU

Every photo, video, and render in this catalog.

Full resolution, organised by product line, in five downloadable packs. No sign-in, no request form — built so your designers can drop them straight into a client deck.

pivotxp.github.io/wm-events-catalog/kit.html

WHERE IT FITS

Mapped to the rooms you are already designing.

Galas & nonprofit

Elevated Kiosk or Pro on the cocktail floor, prints as the auction-night keepsake.

Corporate & conference

Selfie Station at registration, badge scan to capture, data straight to the client.

Weddings & social

360 or Array for the reception, delivered to the guest's phone before the next song.

Gameday & hospitality

Robot and gamification in the activation footprint, leaderboards on the house screens.

PIVOT XP · EXPERIENTIAL TECHNOLOGY

Built for events that cannot fail.

Booths, games, AI, takeaways, connectivity, and the software underneath all of it — one vendor, one standard, wrapped in your client's brand. You design the room. We make sure the technology in it never becomes the story.
